

React Js Software Engineer- Paytm Money

Bangalore, Karnataka / Noida, Uttar Pradesh

Technology - Paytm Money / Full-Time Employment / On-Site

React JS - JD(SE / SSE)

Develop and maintain high-quality web applications using React.js and JavaScript.

Write clean, efficient, and reusable code following best practices.

Build and optimize responsive UI components with React.js and modern CSS frameworks.

Work with RESTful APIs and third-party services to fetch and manage data.

Collaborate with designers, backend developers, and product managers to create seamless user experiences.

Optimize application performance, scalability, and accessibility.

Troubleshoot and debug issues to ensure smooth application functionality.

Stay up-to-date with the latest JavaScript and React.js trends to improve development processes.

Required Skills & Experience

Strong proficiency in JavaScript (ES6+).

Experience with React.js, React Hooks, and functional components.

Understanding of front-end build tools like Webpack, Babel, and npm/yarn.

Proficiency in state management libraries (Context API).

Familiarity with RESTful APIs and asynchronous programming (Promises, Fetch, Axios).

Experience with version control systems (Git, GitHub/GitLab).

Knowledge of modern UI/UX best practices and responsive design.

Experience with testing frameworks (Jest, React Testing Library, Cypress) is a plus.

Familiarity with TypeScript is a plus but not mandatory.

Experience with CI/CD pipelines is a plus.

We may use artificial intelligence (AI) tools to support parts of the hiring process, such as reviewing applications, analyzing resumes, or assessing responses. These tools assist our recruitment team but do not replace human judgment. Final hiring decisions are ultimately made by humans. If you would like more information about how your data is processed, please contact us.
